

Marker Plate

The Orienteering stations are fixed to trees approximately 2 m off the ground. The stations are 15cm x 15 cm square and are painted orange and white similar to the illustration above and have a two letter identification. Below, at approximately 1.5 metres off the ground is a steel plate with a raised dotted pattern. This pattern may be used as a rubbing or copied onto the marker sheet supplied. Points are allocated to the stations and become higher as the distance or difficulty increases.
